WEB DESIGNING AND DEVELOPMENT
COURSE IN JAIPUR

3 Months Job-Oriented Training

www.skillupgrade.in

Course Overview

Launch Your Web Career with Complete Designing and Development Training

This 3-Month Web Designing and Development Course at SkillUpgrades is designed to turn absolute beginners into skilled web developers and designers. Whether you're starting your career, looking to freelance, or want to build your own website or portfolio — this course is your launchpad.

You'll learn the foundations of modern web design, UI/UX principles, responsive layout building, and basic back-end connectivity using live projects, making you job-ready.

What You'll Learn

- HTML5 & semantic markup

- CSS3 styling, transitions, animations

- Responsive web design with Bootstrap

- JavaScript basics: functions, events, DOM manipulation

- jQuery: selectors, effects, and events

- Web layout structuring with Flexbox & Grid

- UX principles and UI best practices

- Introduction to back-end: forms, PHP basics

- Connecting to MySQL for simple data handling

- Building multi-page responsive websites

- Hosting and domain setup basics

Who Should Enroll

- Students and job seekers

- Beginners from any educational background

- Freelancers and bloggers

- Business owners and entrepreneurs

- Anyone looking to build and manage websites

Requirements

- No prior coding knowledge required
